

UNITED FOR YOUR SUCCESS SEMINARS 2020

REACTION PROCESS MACHINERY

KraussMaffei
Pioneering Plastics

Expertise in mechanical and systems engineering for intelligent solutions

Experienced experts train you and your employees so that you can take optimal advantage of the cost-effective performance of KraussMaffei machines and systems. Packed with practical relevance, the training courses are enhanced with theoretical technical skills. We teach you the operation, programming and repair of our systems in a simple and straightforward way. The result: noticeably improved quality of work, higher productivity and fast, effective troubleshooting.

An overview of our seminars is printed on the reverse. For additional information and to register, visit our website: www.kraussmaffei.com/trainingRPM

YOUR BENEFITS:

- Comprehensive practical training
- Experienced trainers
- Small learning groups
- Time for individual questions
- All-around service for hotel reservations

State-of-the-art technology and trainers with many years of experience provide you with the highest-quality training. By means of hands-on exercises, our experts give you the best possible preparation for your tasks in the workplace. Whether beginner or advanced – we offer seminars for all knowledge levels.

**Benefit from the real-world relevance,
personal atmosphere and the flexibility
of our training courses!**

YOUR GUIDELINE TO SUCCESS

BASICS, FUNCTION, OPERATION AND MAINTENANCE

BASICS

Polyurethane
Basic seminar
on polyurethane
technology

1 day

SPECIALIZATION

RS 07, RS 08 or RS TP
Operation of RimStar
pump metering
machine with PUC07,
PUC08 or TP1200
computer

2 days

RTM
Operation of the RTM
metering system

1 day

KK 07
Operation of Comet
and Hybrid piston
metering machine
with PUC07 or
PUC08 computer

2 days

EcoStar
Operation of EcoStar
pump metering
machine

2 days

MKP
Mixing head and
pump seminar

2 days

MKE-3B
Repair seminar
for mixing head
MKE-3B

1 day

Prerequisite for participation
is knowledge of a metering
machine

Individualized training

With individualized training you rely on continuing education measures tailored to your plant, which can take place in your production plant or at our training sites, depending on your task description. Ensure quick successes for your team and efficient handling of the system.
