

GET 6 MONTHS AHEAD.

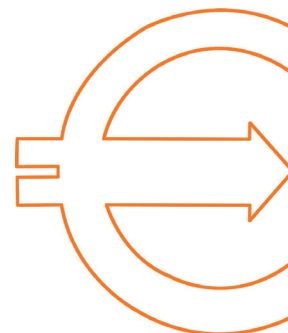

With FuturePay, the future pays off.

Here's how it works: You order your new machine now but pay only a legally stipulated minimum installment – in the example below, 250 euros. The first "real" installment isn't due until after six months. This way, you already enjoy a production head-start but don't pay until your machine purchase is already paying off.

FuturePay is a financing scheme offered by KraussMaffei in cooperation with Deutsche Leasing for you and your success.

Valid for: Single- and two-component injection molding machines from KraussMaffei as well as KraussMaffei RimStar Smart. At www.kraussmaffei.com, all relevant machines that can be financed with FuturePay are specially designated.

Term: 72 months

Financing example*:

Machine

KraussMaffei single-component injection molding machine

Net machine price

€100,000.00

Term

72 months

Monthly installments (in %)

1 – 6: 0.25% of the machine price
7 – 72: 1.563% of the machine price

Monthly installments (in EUR)

1 – 6: €250
7 – 72: €1.563
