

Non-return valve with ZE 23.03 Increased abrasions and corrosion protection

Three or four-wing non-return valve with increased wear-resistance, recommended at a filler and reinforcement material content of 25% and more. Screw heads up to and including D30 are made of powder metallurgical steel. Larger screw heads are protected from wear by carbide inserts. Sliding and pressure rings are also made of powder metallurgical steel.

The wing non-return valve is available for:

- All series
- Screw sizes: SP 55 to SP 24500
- Diameters from 15 to 165 mm

Your advantages at a glance:

- Reinforcing plastic ensure high wear resistance and long service life
- Closing behavior with repetition accuracy
- Ex-stock up to D = 100 mm, additional sizes up to D = 165 mm on request
